PROJECTS

Komanda (MERN (MongoDb, Express, React, Node), Socket.io, Auth0) Jan. 2022 -Apr. 2022

- Komanda is a task manager for developer teams. Users can create teams, add other users in it and manage and assign tasks.
- Implemented functionality on backend and frontend and worked in a team of 6 people.
- Used socket.io to implement real-time functionality, so that users can see updates that other users do in their team.

Video sharing website (ASP.NET WebApp, C#, AWS, JavaScript, HTML, CSS**)** Nov. 2021 - Dec. 2021

- Users can login/register, upload videos, edit descriptions for them, delete videos; leave comments, edit and delete comments.
- Implemented functionality on backend, used AWS services such as DynamoDB, S3 Bucket, RDS, Parameter Store; deployed to AWS Beanstalk.
- Worked in a team of 2 people.

Kitchen Tracker (JS, Java Spring Boot, MongoDb, HTML, CSS) Sept. 2021 – Nov. 2021

- Kitchen Tracker is inventory management for the kitchen and platform for sharing recipes.
- Implemented functionality on backend Spring Boot with MongoDb, worked in a team of 6 people.

PROJECTS

Recipe App (ReactJs, Express, Node, MongoDb, Socket.io)

- Personal project for practice. Website for sharing recipes. Users can share recipes and leave comments in real time. Still in progress.

Reactivities (ASP.NET WebApi, React, TypeScript, MobX, SignalR, SQL)

- Project from Udemy course. Event Management Application.
- Learned a sense of how to use above technologies to build an app.

NOTE

As a dedicated life-long learner, I am constantly upskilling myself to meet the demands of today's labor market. I have worked tirelessly on my communication and teamwork skills, which I will use in my future career. Even though I am a fresher, I assure you that I will give my best and work to my full potential so that I contribute as much as I can towards the growth and welfare of the company I will work for.
